Montessori House of Children

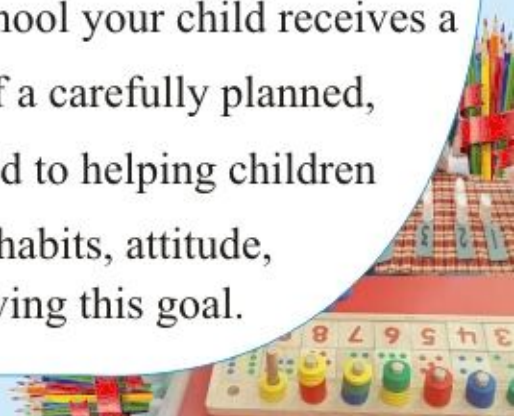

What is the Montessori Method?

Dr. Montessori believed that every child learns individually and should be encouraged to work at his or her own pace. The Montessori method allows children to discover and learn from their own experiences and is based on principles including observation, order, construction and independence in the prepared environment.

In a Montessori classroom, teachers observe children as they work, quietly offer guidance and prepare them for their next activity when it's time to do so. The classroom is designed so that a child can access the Montessori materials easily, freely selecting and replacing them without the need of adult's assistance.

What is the goal of a Montessori education?

The goal is to prepare children for a lifetime of creative thinking and learning. At Shining Stars School your child receives a broad academic education in the context of a carefully planned, stimulating environment. We are committed to helping children develop within themselves the foundation habits, attitude, skills and ideas that are essential for achieving this goal.

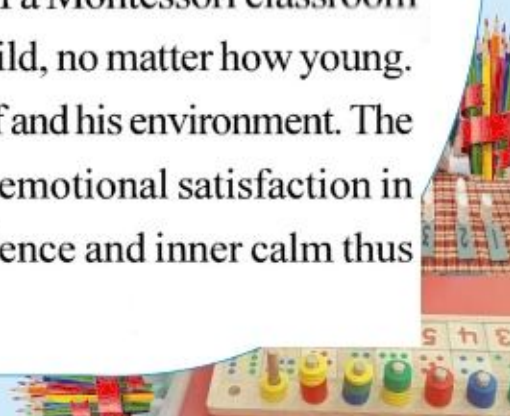

What happens when a child goes from a Montessori school to a traditional school?

When children leave Shining Stars School, they leave with inner self-discipline, a positive attitude towards school and learning, self-esteem and a habit of concentration on tasks. Often, but not always, they are ahead of their peers. The skills and attitudes developed at Montessori lead to a lifetime of curiosity and learning a benefit for children who move from Montessori to private or public schools.

What is the main difference between a traditional classroom and a Montessori classroom?

In Montessori classrooms, teachers address the needs of individual child, who are learning through practice with hands-on materials. The teacher introduces a child to materials systematically, depending on developmental needs.

The Montessori classroom is designed to promote self-discipline, independence and responsibility. Academically, children develop a foundation in language and math skills, physical and cultural geography, zoology, botany, physical science, history, music and art/ They also learn practical life skills such as kitchen activities, carpentry, sewing and cleaning. One of the most important aspects of a Montessori classroom is the teacher's respect for the dignity of the child, no matter how young. These activities help child to take care of himself and his environment. The child learns concentration, experiences deep emotional satisfaction in completion of self chosen task, brings confidence and inner calm thus building the EQ.

Montessori Class Room & Materials

What is special about Montessori materials ?

The classroom has to quality child-sized furnishings and learning apparatus. Materials kept on shelves designed specifically for them. Children are taught how to use the materials and then to move about the room, selecting their activities their work, either individually or in small groups.

Montessori materials are specifically designed to be self-correcting for errors, allowing children to learn on their own, under the guidance of the teacher.

What is different about a Montessori teacher?

A Montessori education means that a child has a very special guide for his or her self-led journey. Montessori teachers are called Directress or Director and are certified after hundreds of hours of specialized training. They are skilled at asking questions rather than providing answers. They know how to observe children as they learn. They know how to help a child build self-confidence and self-esteem. The environment and method provide discipline. The Montessori teacher gives guidance.

Montessori School Building

Salient Feature :

- Montessori Approach
- Experiential Learning
- Activity Based Learning
- No school bag, No home work
- Low student teacher ratio.
- Skilled & brain based Classroom
- Education through development of senses

Parents Feedback ...

“My daughter Aaradhya Vyas has learn a lot started Speaking so nicely with clear words and lots of actions. Thanks Shining Stars School for all the success and maintain growth in our daughter, she is happily enjoying.”

Gaurav Vyas

Parent (Play Group)

“ I love the learning environment with interesting different activity to do. I think this is the best nursery school.

Akshay Khadse

Parent (Advait Khadse)

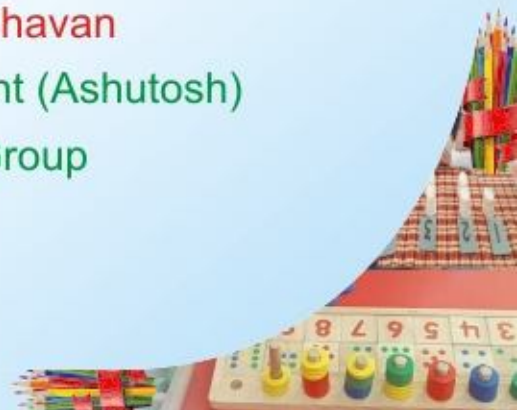

M1 Class

“ My son was having writing problem and his concentration power was also zero, but because of Shining Stars, activity based learning and unconditional extra effort of teachers I got excellent results in my ward. Now he is improved very much and his G.K. Skills are also good than earlier.”

Mr. Chavan

Parent (Ashutosh)

M3 Group

“ Increased sitting span and concentration in my child after joining school.

Good environment and excellent teaching method for children.”

Mr. Madhyaswar

Parent (Swraj - M.Group)

“ My daughter is very enthusiastic coming to school because “No burden of home work” All studies going well in school.

Ganesh Gundawar

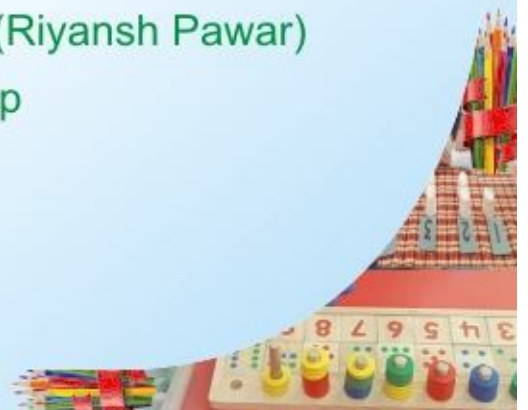

Parent (Soumya - M1 Group)

“ Riyansh takes some vegetables or some other objects from home and teaches us add one activity. It is very interesting for us. Thank u Shining Stars team.”
